# DoMEv3

### Database

- ArrayList<DoMEEntry> items
- + Database()
- + addItem(DoMEEntry): void
- + list(): void
- + main(String args[]) : static void

### Interface DoMEEntry

- + getComment(): String
- + getOwn(): boolean
- + print(): void
- + setComment(String): void
- + setOwn(boolean): void

# **Abstract Item**

- String comment
- boolean gotlt
- int playingTime
- String title
- + Item(String, int)
- + getComment() : String
- + getOwn() : boolean
- + print(): void
- + setComment(String) : void
- + setOwn(boolean) : void
- # abstract printSpecifics(): void
- # abstract printType(): void

## CD

- String artist
- int numberOfTracks
- + CD(String, String, int, int)
- + getArtist() : String
- + getNumberOfTracks(): int
- # printSpecifics(): void
- # printType(): void

### DVD

- String director
- + DVD(String, String, int)
- + getDirector() : String
- # printSpecifics(): void
- # printType(): void
